

FAQs

ASFA HEALTHCHECK

powered by UAB GuideSafe™

What is ASFA Healthcheck?

ASFA Healthcheck powered by UAB GuideSafe™ is a web-based COVID-19 assessment tool for employees and students that assesses the existence of any current COVID-19 related symptoms, exposure history, and testing history. The required assessment will help us all return to campus safely and help our community beat COVID-19.

How does GuideSafe™ Healthcheck work?

Employees and students log on regularly to share symptoms — even if you are feeling healthy — to ensure a safe return to campus. The initial survey takes about 20 seconds to complete. Subsequent surveys take about 10 seconds to complete. We require employees and students to complete it daily.

If the survey responses indicate the user is symptom-free and has no close exposure to someone with COVID-19 illness, the individual is cleared to enter campus.

If ASFA Healthcheck responses show the user is currently experiencing COVID-19 symptoms or has been exposed to someone with COVID-19, or has been diagnosed with COVID-19 in the preceding month, the user will not be permitted to enter campus until medically cleared. If you have symptoms, contact your health care provider and notify your supervisor. Do not come to work or report to campus ([CDC isolation guidance](#)).

How do I access ASFA Healthcheck?

You can access GuideSafe™ Healthcheck, a password protected system, on a phone, tablet, or computer. Once the system is in place a link will be shared. It will be mobile-enabled so that it can be easily viewed on your phone. The site can be pinned to your smartphone home screen so that it appears as an app.

Why do I have to report my symptoms so regularly?

Because COVID-19 symptoms are a report at a single moment of time, students and employees should report their symptoms daily and are required to complete ASFA Healthcheck daily to confirm how they are feeling.

I'm not cleared to re-enter campus. Should I be participating in Healthcheck?

You should continue using Healthcheck.

Why is ASFA requiring us to use Healthcheck?

ASFA Healthcheck is a COVID-19 assessment tool which helps to keep our community safe by identifying those who may be sick or be at risk of becoming sick. We are using this system instead of on-campus temperature checks or screenings.

Is GuideSafe™ Healthcheck secure? Is my privacy protected?

Healthcheck is a HIPPA compliant platform.

Healthcheck does not in any way track you as a person. It is a tool for you to report COVID-19 symptoms and any exposure. It does not track your location. ASFA admin will receive the information to ensure compliance with HealthCheck and to ensure that those coming on campus are not showing symptoms.

Will I remain anonymous?

ASFA will receive your information submitted with Healthcheck. The information is to ensure compliance and to identify employees or students who may need to be tested to further prevent the spread of COVID-19.

Will I receive notifications or reminders to fill out GuideSafe™ Healthcheck?

There will be an option for you to receive reminders to report how you are feeling.
